What you need

Company Profile

ABOUT US

Found in 2010, AGR has been instrumental in making its client's infrastructure more efficient through building, integrating terrains and living spaces. AGR has constructed landmark edifices across Telangana and Andhra Pradesh. AGR touches your lives through landmark structures including villas, Residential & Commercial buildings and Infrastructure Development etc. Off late, the company has started expanding vistas by taking orders from international consumers. We strive to achieve excellence through speedy execution with quality, cost efficiency, management of sustainability concerns, safety and all regulatory compliances etc.

Our Core Business Area

Our projects are constructed using state of the art technologies which stands as cornerstone of our success. We are experts in construction of villas, Residential & Commercial buildings and Infrastructure Development.

Our projects follow industry standards and skilled delivery of modern design. We take extra care to provide quality with perfect execution of customer requirements so that you lead a hassle-free business with your consumers.

Trust us for your better business needs. We have a long list of happy customers who have approached us for their construction and infrastructure needs time and again.

PROJECT PORTFOLIO

Our Vision

To make a reputable position in construction industry by attaining excellence in quality with continuous innovation, development and adoption of industry standards to enhance construction management.

To be a change making construction and infrastructure enterprise committed to quality and technological need of the world. We strive to be a landmark of customer satisfaction, social force of professional conduct and a propagator of the advanced practices of the industry.

Our Mission

To maintain quality in construction and infrastructure development with ethical business practices and high end professional support To deliver exceptional value to the client through honest, dedicated and focused solutions in the creation of building assets and to build trust with the clients – not just construct buildings for them.
